

3rd Brazilian Swedish Workshop in Aeronautics and Defence

November 12th, 2015

Sweden as an inspiration for the innovation in the State of Alagoas

Pablo Viana

Secretary of S&science, Technology and Inovation

Experience in Sweden in 2014

- Postdoc in Linköping University, dept. of Electrical Engineering (Electronic Devices) under supervision of prof. Atila Alvandpour and Ingemar Söderquist (Saab).
- Title of project: "Design for Manufacturing on Flash-based FPGA Circuits for Avionic System Interfaces"

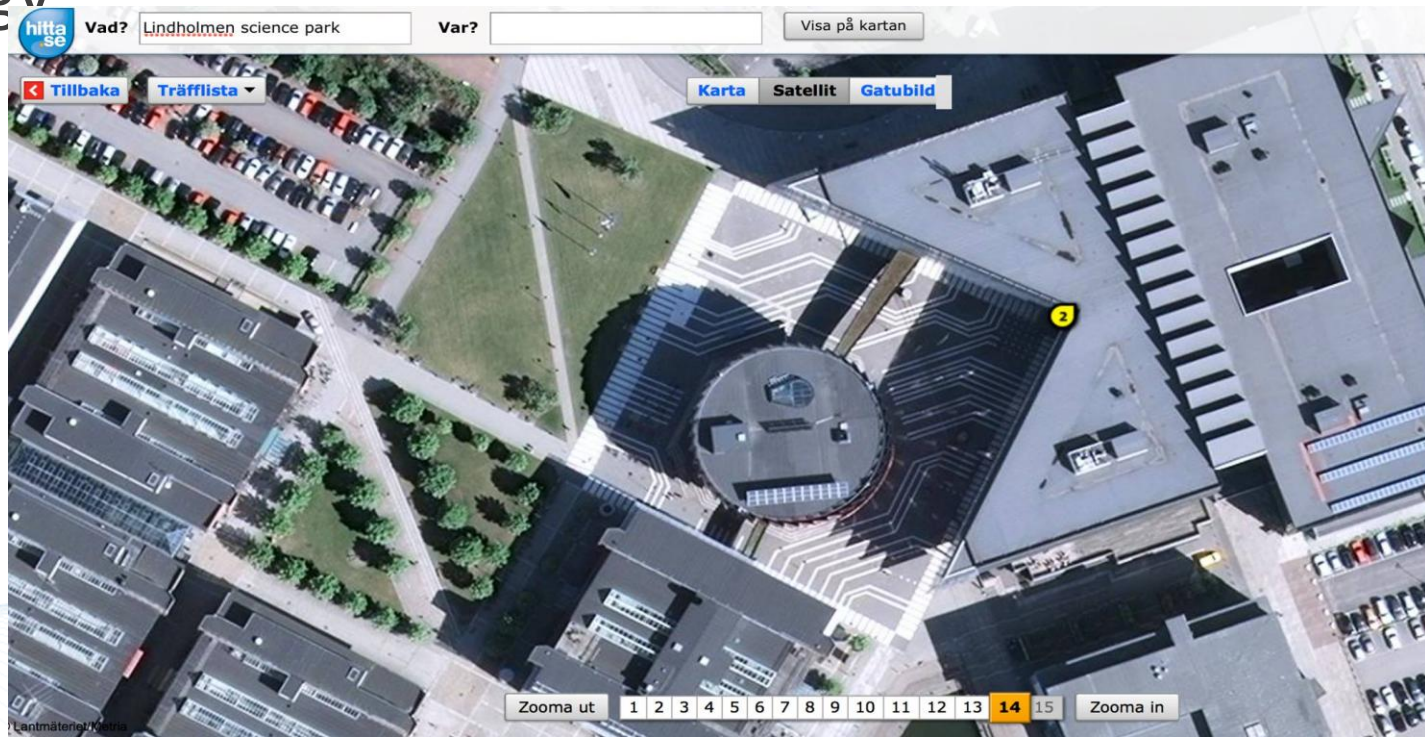

Experience in Sweden in 2014

- Interaction with participants from distinct research groups;
- Participation in some workshops and meetings organised by Saab
- Knowing some of the people at Mjärdevi and

Sweden is an innovation environment on full time

- Sustainability
- Technology
- Technology

Considering the differences which of the remarkable Swedish concepts for innovation could help to inspire us?

Technological Park of Alagoas

Information Technology
Maceió (Capital)

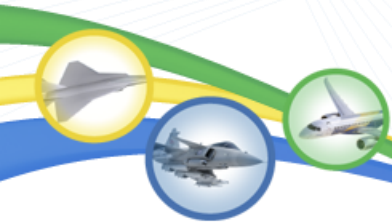

Milk and derivatives
Batalha

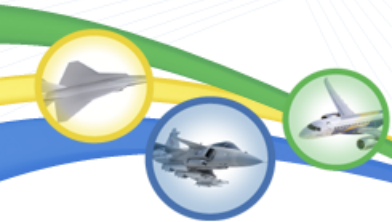

Fruits and Vegetables
Arapiraca

Technological Park of Alagoas

**State of Alagoas – Science, Technology
and Innovation are always very welcome.**

Conclusion

The best results from our scientific research and colaboration may be much beyond o

Strong and fruitfull cooperation can be built by sharing complementary characteristics

Sweden was an unforgettable experience:

- personally, familiar and professional

Now, we look forward to retribute the opportunity. Visit Alagoas!

Thank you.
